

Note: If your SAP GUI version is lower than 7.40 then first upgrade it.

If Script file doesn't works, then follow below steps

SOP for SAP LOGON PAD entry

1. Make entries in hosts file of the local desktop under path
C:\Windows\System32\drivers\etc

```
10.201.219.39 erpprdapp.erp.bsnl.co.in erpprdapp
10.198.216.91 eccci.bsnl.co.in
10.201.219.59 eppprdapp eppprdapp.erp.bsnl.co.in
10.198.216.91 erpportal.bsnl.co.in
```

```
10.201.219.39 erpprdapp.erp.bsnl.co.in erpprdapp
10.198.216.91 eccci.bsnl.co.in
10.201.219.59 eppprdapp eppprdapp.erp.bsnl.co.in
10.198.216.91 erpportal.bsnl.co.in
```

2. Make entries in services file of the local desktop under path

C:\Windows\System32\drivers\etc

```
sapmsPRD 3601/tcp
sapmsEPP 3601/tcp
```

Put space in the file after the entry

```
sapmsPRD 3601/tcp
sapmsEPP 3601/tcp
```

Also either delete following entries or comment it with #

```
sapmsPRD 3600/tcp
```

```
sapmsPRD 3600/tcp
```

3. Delete existing connections from SAP Logon PAD & close it
Also delete all files from Common folder under path

C:\Users\%User%\AppData\Roaming\SAP\Common

4. Now open SAP GUI Logon pad ,if entry is not available then maintain the entries in the below sequence

Description : ECC HANA SOH

System ID : PRD

Message Server : erpprdapp.erp.bsni.co.in:3601

Connection Network Code Page

Choose the connection type and change the system parameters as required. Delete the old description if you want the system to propose a description. The 'OK' button is activated once you have entered all required input data.

Connection Type

Group/Server Selection
 Custom Application Server

System Connection Parameters

Description:	<input type="text" value="ECC HANA SOH"/>
System ID:	<input style="border: none; border-bottom: 1px solid black; padding: 2px 5px;" type="text" value="PRD"/>
Instance Number:	<input type="text" value=""/>
SAProuter:	<input type="text" value=""/>
Group/Server:	<input type="text" value=""/>
Message Server:	<input type="text" value="erpprdapp.erp.bsni.co.in:3601"/>

 Enter the required data

5. Click on the right side dropdown of Group/Server and select PUBLIC

Connection Network Code Page

Choose the connection type and change the system parameters as required. Delete the old description if you want the system to propose a description. The 'OK' button is activated once you have entered all required input data.

Connection Type

Group/Server Selection
 Custom Application Server

System Connection Parameters

Description: ECC HANA SOH

System ID: PRD

Instance Number: 00

SAProuter:

Group/Server: PUBLIC

Message Server: erpprdapp.erp.bsnl.co.in

 IP address=10.201.219.30 cannot be converted to the host name (d:\depot\bas\753_REL\fes_770_REL\src\fes\few\sapdpams\dpamsci.cpp,1489)

6. Click on ok and entries will be saved.
